

CKD education for more of your patients!

New language offerings mean greater reach for better health

Kidney Smart®'s goal is to provide all patients the gift of education. To help achieve that goal, we're offering classes in multiple languages—with more coming soon. This expands the patient population this award-winning education serves and helps patients live their best lives with kidney disease.

Current language offerings:

- Arabic
- Cantonese
- Hindi
- Korean
- Mandarin
- Russian
- Spanish
- Tagalog
- Vietnamese

Additional classes and languages to be added soon. Let your Kidney Smart lead know of any languages you think would be helpful for your patient population.

How does it work?

Education is delivered live by a bilingual educator or through a translator who plays a recorded Kidney Smart class for attendees.

Recommend patients now!

Don't forget to include the patient's language when you recommend them.

To recommend patients, use your usual Kidney Smart recommendation process or one of these options:

- EHR
- KidneySmart.org/recommendation
- Call/send patient details to your local Kidney Smart coordinator

Questions? Contact your local Kidney Smart team or the national team at info@KidneySmart.org.
